Harmonic oscillator test

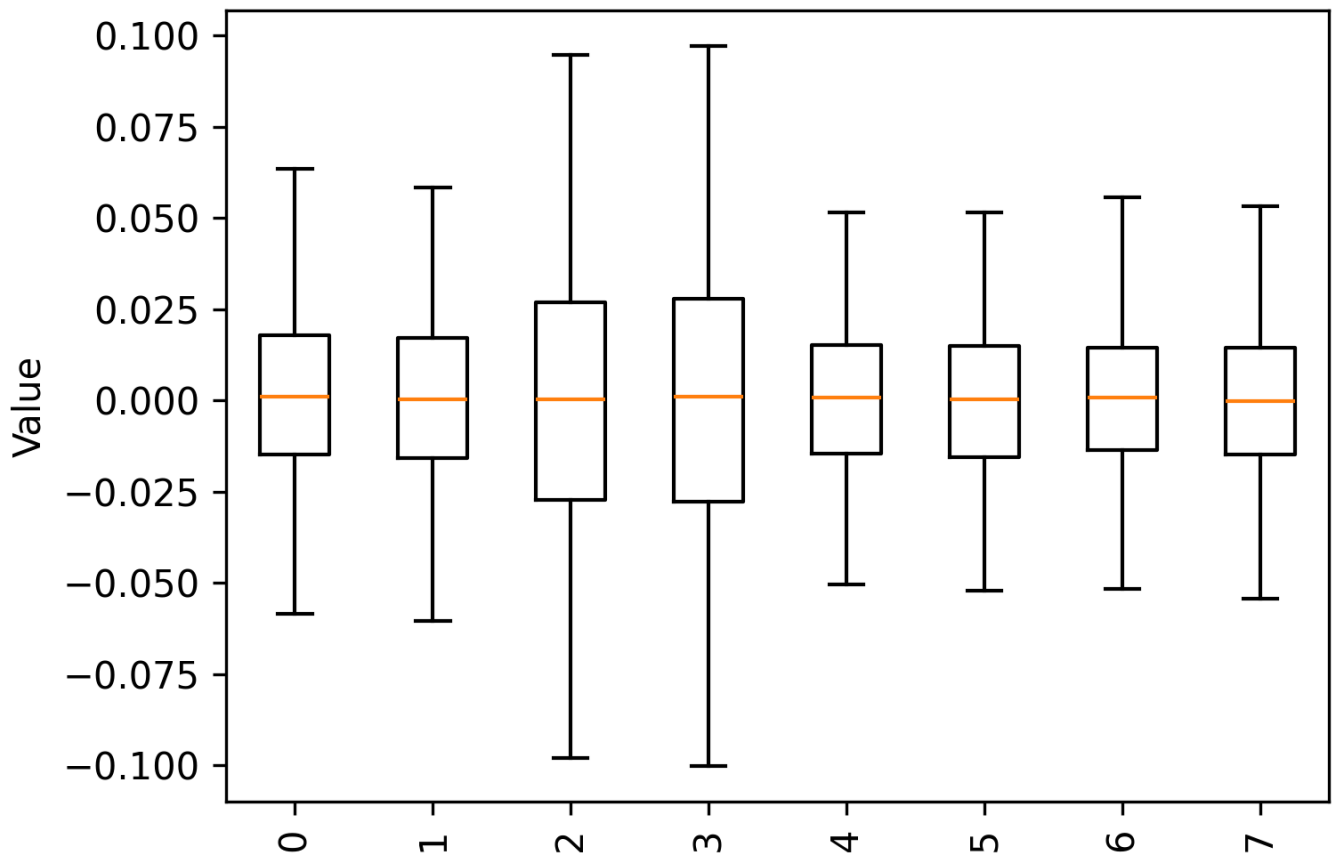

Run sinus for some periods and compare against true value.

periods = 1

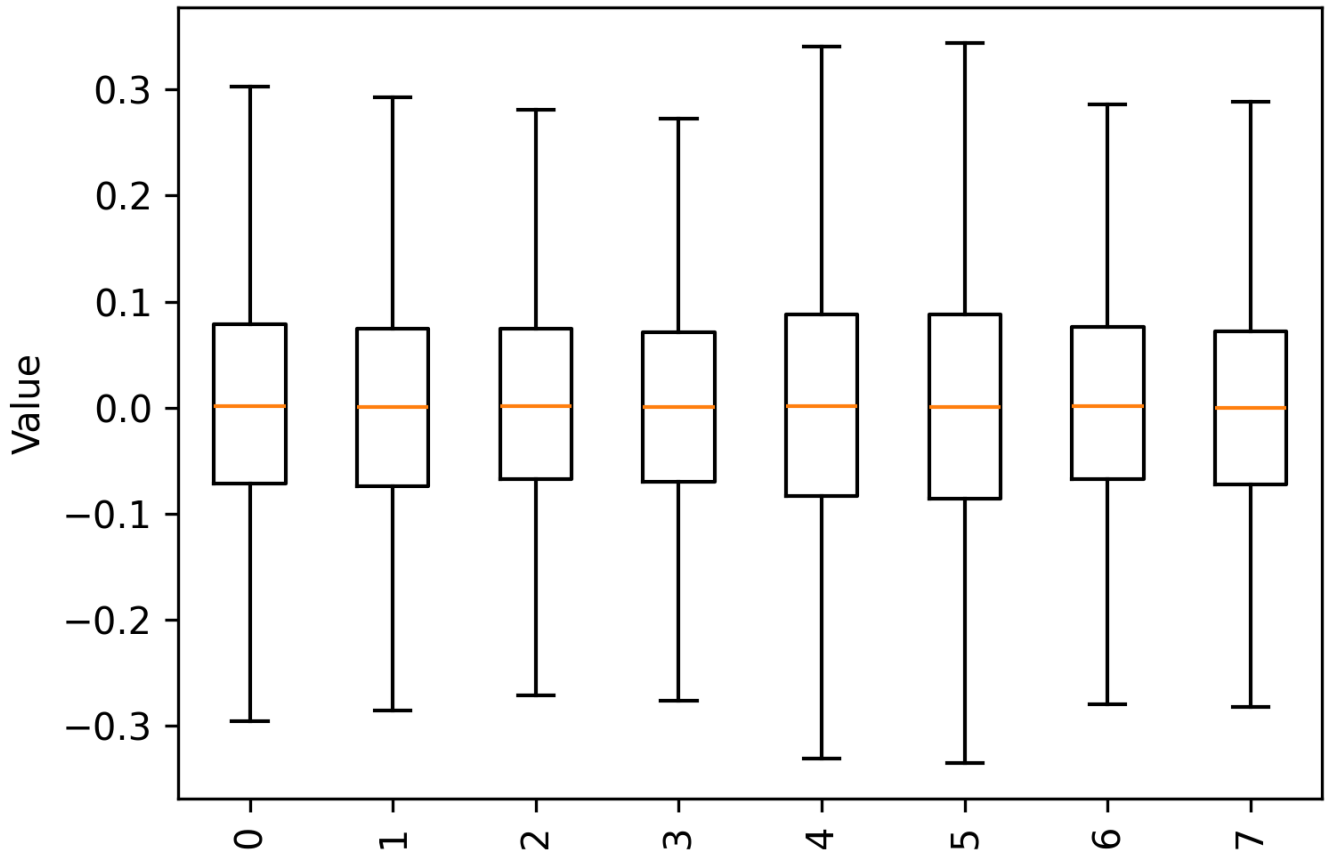

periods = 10

Lane test

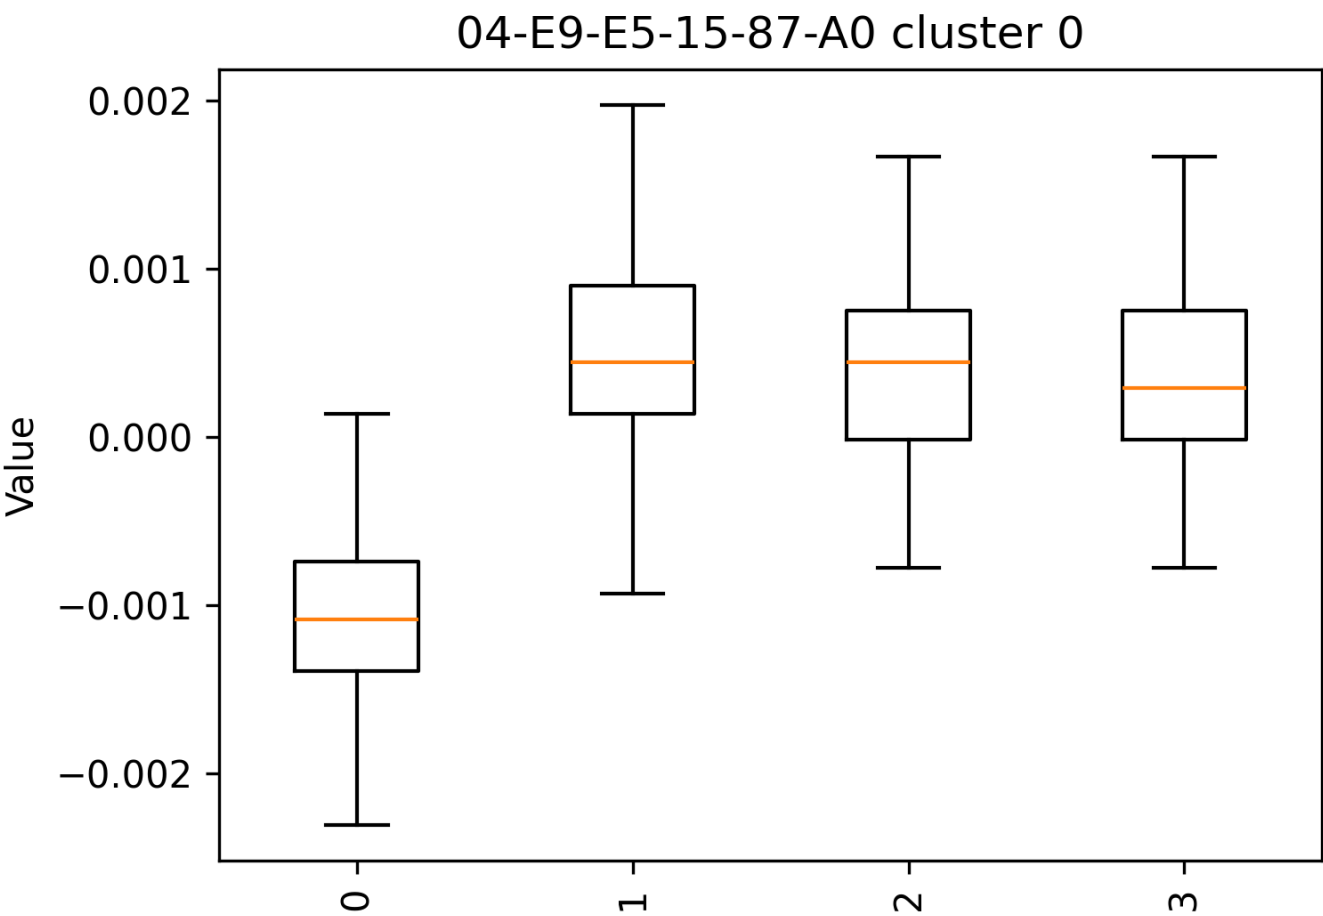

Evaluation of each lane using constant input and probe through coef element with 0.56 and ident element.

04-E9-E5-15-87-A0 cluster 0

Multiplication test

Evaluate each multiplication using $0.8 * 0.7 = 0.56$.

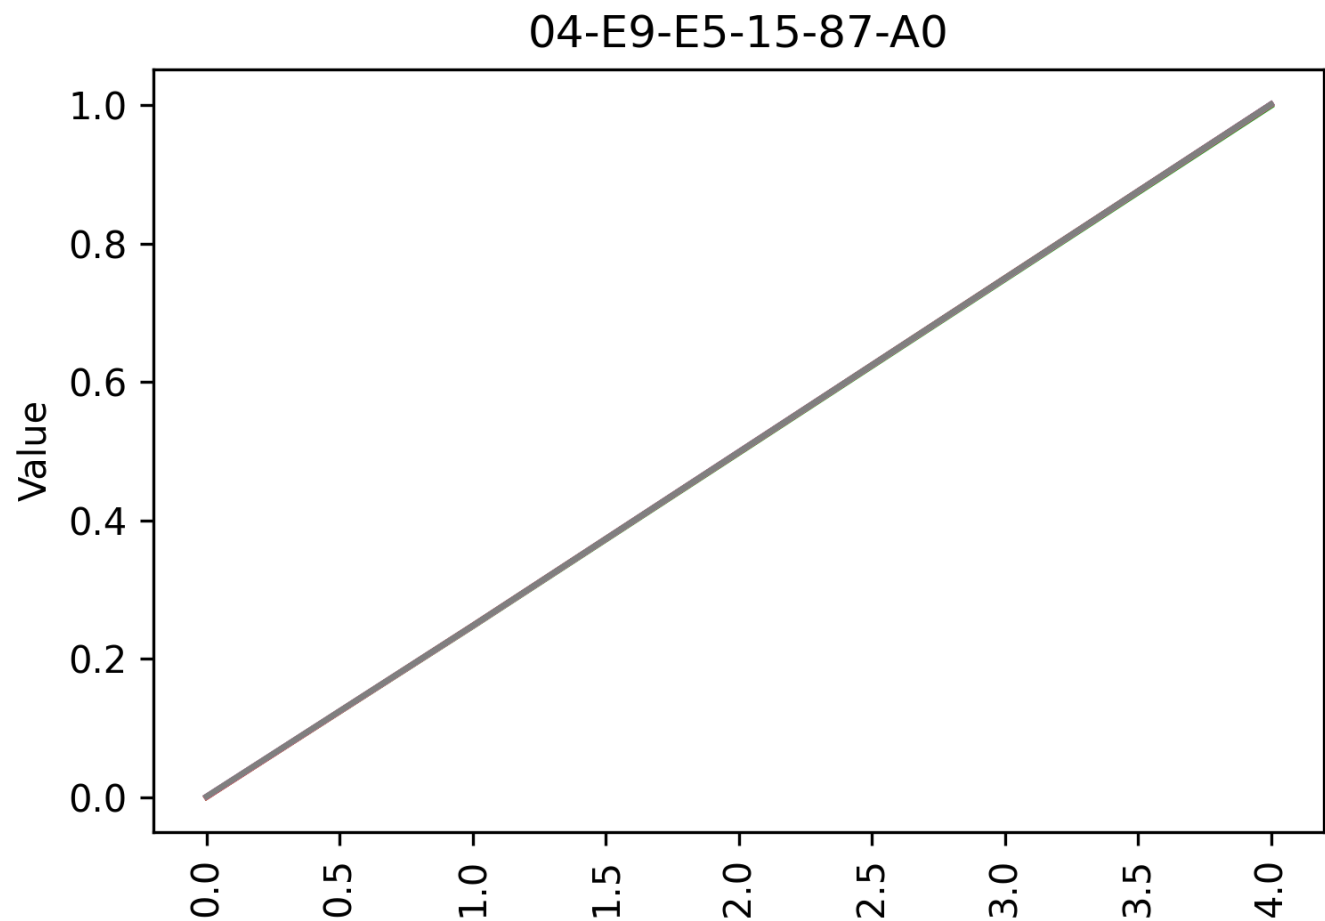

Integrator test

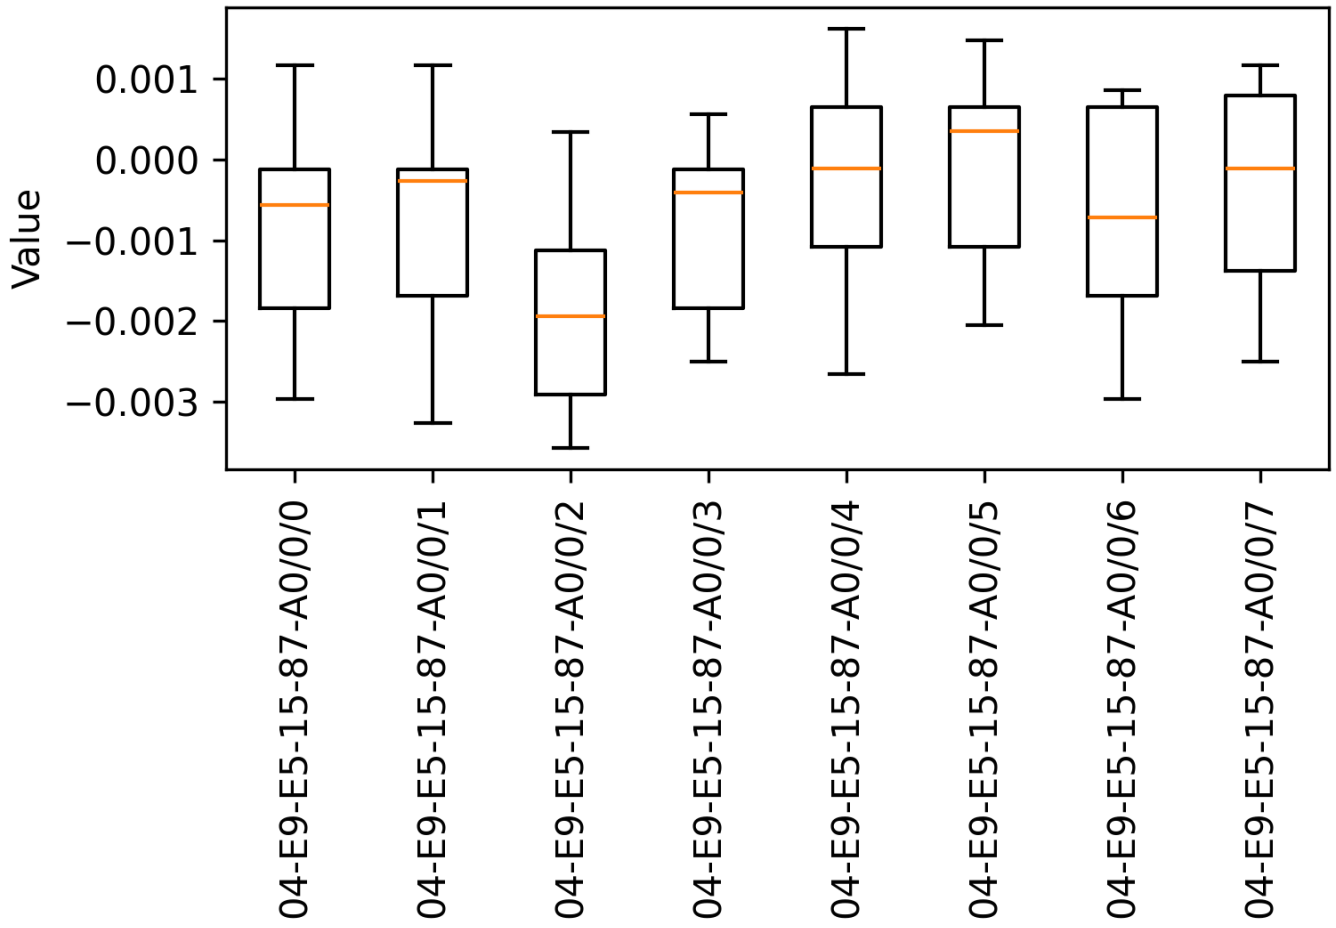

Evaluate each integration with 0.1 input over time period that must reach 1.0.

The optimal slope then is subtracted from the probed slope.

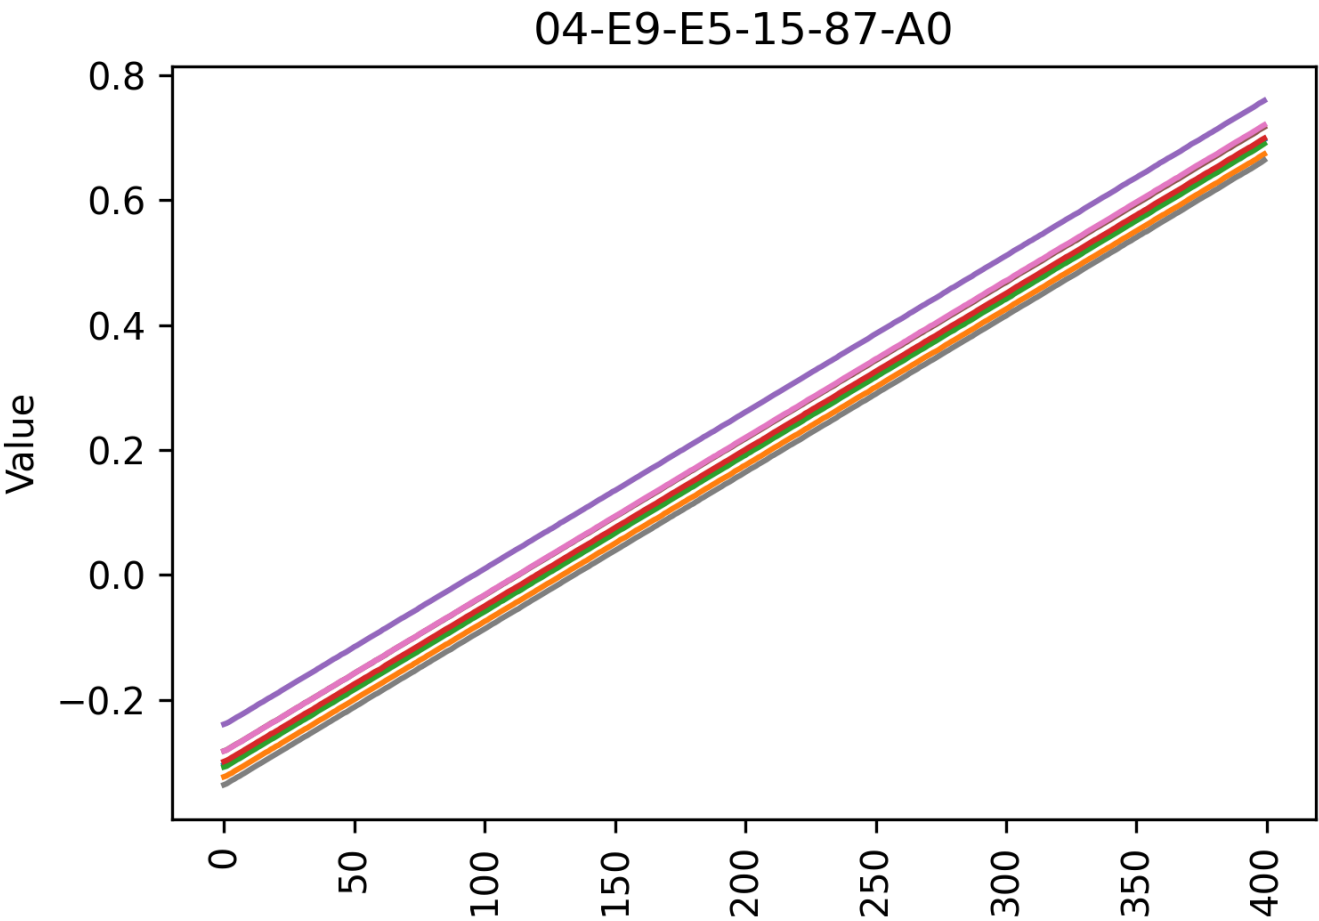

k = 10000 ,slope = 1.0
